

# CLAIMS

## WHAT IS CLAIMED IS:

1. A movable support system for at least one display device comprising:  
a track system;  
a base movably mounted at a first section to the track system;  
a display support assembly adapted for coupling of the display device  
and pivotally mounted at a second section of the base;  
wherein a display device installed on the display support assembly may  
be selectively positioned for use in a variety of locations relative to the track system.
2. The system of Claim 1 wherein the track is linear.
3. The system of Claim 1 wherein the track is coupled to an article of  
furniture.
4. The system of Claim 1 wherein the track is mounted on storage  
furniture.
5. The system of Claim 1 wherein a work surface is mounted over the  
track.
6. The system of Claim 1 wherein the display support provides a plurality  
of arms.
7. The system of Claim 1 wherein the support is configured to provide at  
least one passage for management of one or more cables coupled to the display  
device.
8. The system of Claim 1 wherein the support includes a hub providing for  
management of one or more cables coupled to the display device.
9. The system of Claim 1 wherein the display support is configured for  
coupling of two display devices.

1 19. The apparatus of Claim 18 wherein the track system is a linear track.

1 20. The apparatus of Claim 18 wherein the track is mounted to an article of  
2 furniture.

1 21. The apparatus of Claim 18 wherein the track is mounted on storage  
2 furniture.

1 22 The apparatus of Claim 18 wherein a work surface is mounted over the  
2 track.

1 23. The apparatus of Claim 18 wherein the display support has at least two  
2 articuable arms.

1 24. The apparatus of Claim 18 wherein the support is configured to provide  
2 a passage for management of wires.

1 25. The apparatus of Claim 18 wherein the support manages wires through  
2 a hub.

1 26. The apparatus of Claim 18 wherein the display support is pivotably  
2 coupled to the support at a hub.

1 27. The apparatus of Claim 18 wherein the display support provides at  
2 least two flanges each for attachment of at least one articuable arm attachable to at  
3 least one display device.

1 28. The apparatus of Claim 18 further comprising at least one display  
2 device coupled to the display support.

1 29. The apparatus of Claim 18 wherein the support is cantilevered from the  
2 track.

001.1138548.3

1 30. The apparatus of Claim 18 wherein the support is perpendicular to the  
2 track.

1 31. The apparatus of Claim 18 wherein the support is non-pivotably  
2 mounted to track.

1 32. The apparatus of Claim 18 configured for use in a work space  
2 providing at least one mobile table and wherein the support is at a height above the  
3 mobile table.

1 33. The apparatus of Claim 18 wherein the support is configured to provide  
2 at least one passage for management of at least one cable coupled to the display  
3 device.

1 34. A movable support system for at least one display device configured to  
2 be coupled to utilities such as power or data through cables, comprising:  
3 a track;  
4 a support movably mounted at a first section to the track;  
5 a display support adapted for coupling of a display device and pivotally  
6 mounted at a second section of the support;  
7 wherein a display device installed on the display support may be  
8 selectively positioned for use in a variety of locations relative to the track; and  
9 wherein the support is configured to provide at least one passage for  
10 management of cables configured to be coupled to the display device.

1 35. The system of Claim 34 wherein the track is linear.

1 36. The system of Claim 34 wherein the track is coupled to an article of  
2 furniture.

1 37. The system of Claim 34 wherein the track is mounted on storage  
2 furniture.

1 38. The system of Claim 34 wherein a work surface is mounted over the  
2 track.

1 39. The system of Claim 34 wherein the display support provides a plurality  
2 of arms.

1 40. The system of Claim 34 wherein the support is configured to provide at  
2 least one passage for management of cable coupled to the display device.

1 41. The system of Claim 34 wherein the support includes a hub providing  
2 for management of one or more cables coupled to the display device.

1 42. The system of Claim 34 wherein the display support is configured for  
2 coupling of two display devices.

1 43. The system of Claim 34 wherein the display support includes a pair of  
2 flanges and a pair of arms and a display device is attachable to each of the pair of  
3 arms.

1 44. The system of Claim 34 further comprising at least one display device  
2 coupled to the display support.

1 45. The system of Claim 34 wherein the support is cantilevered from the  
2 track.

1 46. The system of Claim 34 wherein the support is perpendicular to the  
2 track.

1 47. The system of Claim 34 wherein the support is non-pivotably mounted  
2 to track.

1 48. The system of Claim 34 configured for use in a work space providing at  
2 least one mobile table and wherein the support is at a height above the mobile table.

1 49. The system of Claim 34 wherein the display support is configured for at  
2 least two display panels.

1 50. The system of Claim 34 wherein the management of cables is provided  
2 at least partially through passages in the support.

1 51. A movable support system for use by at least one person in a work  
2 space having an entrance, comprising  
3 a track system;  
4 a base movably mounted at a first section to the track system;  
5 a display support assembly adapted for coupling of at least one display  
6 device and pivotally mounted at a second section of the base;  
7 wherein a display device installed on the display support assembly may  
8 be selectively positioned for use in a variety of locations relative to the track system  
9 so that each person within the work space may selectively choose a body orientation  
10 or a body position relative to the entrance or otherwise within the workspace while  
11 using the display device.

1 52. The system of Claim 51 wherein a range of motion provided by  
2 at least one of the base or display support assembly is such that the body orientation  
3 or body position of at least one person using the display device in the work space  
4 relative to the entrance may include (a) back to the entrance; (b) face to the  
5 entrance; or (c) profile or side to the entrance.

1 53. The system of Claim 51 wherein a position of the person relative  
2 to the display device can be adapted from a first position where information  
3 contained on the display device is not perceptible to the person to a second position  
4 where information contained on the display device is perceptible to the person by  
5 relative movement at least one of the base or the display support assembly device  
6 and without requiring that the person make substantial change in body orientation or  
7 body position.

1 54. The system of Claim 51 wherein one or both of two users can adapt  
2 the position of at least one display device to improve the viewing position for  
3 perception of information on the display device by movement of at least one of the  
4 base or the display support assembly.

1 55. The system of Claim 51 wherein the display device can be moved  
2 using at least one of the base or the display support assembly from a non-use  
3 position where information contained on the display device is not perceptible to the  
4 person to an in-use position where information contained on the display device is  
5 perceptible to the person.

1 56. The system of Claim 51 wherein the display device is configured for  
2 use by a plurality of users including a first group of at least one person and a second  
3 group of at least one person and for movement between a first position and a second  
4 position so that in the first position information contained on the display device is  
5 perceptible to the first group and in the second position information contained on the  
6 display device is perceptible to the second group, the information being private or  
7 concealed to the second group of users in the first position and public or visible to  
8 the second group of users in the second position.
